

TUPPERMIX SET

The TupperMix set has been designed like the MasterMix collection itself; to offer you the latest **advances in food safety, storage and cooking facilities**. Its 3 models provide you with the ideal sizes to preserve your recipes.

- **Large:** with a capacity of 1520ml. Dimensions 23.5 x 18 x 7.6 cm and a cumulative weight of 916g.
- **Medium:** with a capacity of 1050ml. Dimensions 21.2 x 16.2 x 6.9 cm and a cumulative weight of 688g.
- **Small:** with a capacity of 640ml. Dimensions 18.5 x 14 x 6.3 cm and a cumulative weight of 491g.

Far from being mere containers, the TupperMix Set has unique qualities, aimed at satisfying all your needs in the gastronomic world.

Starting with its materials: **high-strength glass** to ensure above-average durability, as well as the ability to maintain the properties (smells, tastes, textures) of your **dishes unaltered for a longer period of time**. This is not only a pleasure, but also a cost-saving investment for your pocket. For zero food waste!

Another key differentiating feature is its **vacuum extractor valve**. You can use them together with a packaging machine to enhance their qualities by sealing. The perfect duo to keep your food intact and increase its freshness up to 5 times more.

The quality of materials is another of its maxims. Therefore, they are completely **dishwasher, microwave and oven safe up to 560°C**. .. The TupperMix Set allows you the versatility to finish cooking your preparations, or reheat them in a simple way, and then you can sanitise the tupper without complications.

On the other hand, you can **safely freeze down to -40°C**, because they can also withstand freezing temperatures while still providing all their benefits.

Last but not least, **the silicone seal** is an extra point in terms of reliability. Ensuring an airtight seal, without cracks or unpleasant surprises.

Become a “master” in the kitchen with the TupperMix Set
