

## SET OF FRYING PANS, 5 PCS. WITH STONE COATING IN ALUMINIUM

The new set of frying pans combines unique and innovative features. It is developed with the best materials, such as cast aluminium. This element gives our product a superior quality and a stronger and more resistant lifespan.

In addition, we can find a double layer stone bottom inside, which allows for better cleaning, and food does not stick.

Lufthous is a brand that takes care of even the smallest detail, and a clear example of this is the product that is before you.

It is also important to highlight the PYREX glass lids with high temperature resistance, which allows us to see the state of the food we are cooking.

One of the premises on which we have worked most in the design and manufacture of this product, is to ensure that the result of cooking is the most optimal possible.

With the LuftHous frying pans, thanks to its diffuser bottom and the thickness of the sides, you will achieve an ideal distribution of heat over food, thus facilitating cooking and maintaining the temperature.

Put into practice your culinary skills and cook meats, fish, seafood and vegetables while preserving all their properties.
