PHARMAVISCOS 3D CARBON MATTRESS

A REVOLUTION IN THE FIELD OF RELAXATION:

Finally we have the mattress we really need within our reach. This is a revolutionary new product, with greater strength and durability (thanks to its viscoelastic material), hypoallergenic and antibacterial, and also perfectly fits our body temperature.

The PHARMAVISCOS 3D CARBON mattress is a marvel of cutting-edge engineering, free of petroleum-based components, which have been replaced with vegetable-based products. This results in a more natural mattress and, therefore, provides the most hygienic, ecological and healthy sleep.

THE KEY TO A BETTER LIFE:

Usually people sleep less than we need, either due to work, stress or our way of life. It is therefore very important that the hours we spend at rest are as fruitful as possible. The PHARMAVISCOS 3D CARBON mattress significantly improves our quality of sleep, providing excellent results for our well-being (reduction of physical discomfort and greater feeling of relaxation and vitality, among others).

For those who suffer discomfort in the lower back or stiffness, neck or shoulder discomfort, or others. Undoubtedly, this is the solution you need.

Improve your quality of rest and vitality thanks to PHARMAVISCOS 3D CARBON!

A NEXT-GENERATION FINISH:

For those who know what they really need, PHARMAVISCOS 3D CARBON gives them the opportunity to enjoy one of the mattresses with the most advanced technology developed so far.

The finish is a work of engineering and is developed with the best raw materials. Its 3D mesh allows the mattress to receive the best indoor ventilation. This together with its multi-padded layers and its new fabric system, gives you the best breathability and hygiene you need for your daily rest.

The connection between the fabrics has been carried out with hot ecological glue and treatment with aloe vera to bring us many benefits.

We should also note the lumbar support so that every morning your body is full of vitality and pain-free.

LUFTHOUS DESIGNS THE REST YOU NEED:

The design of the PHARMAVISCOS 3D CARBON mattress symbolizes the high quality and comprehensive quality control in their manufacture.

Using only the best materials, LuftHous has made it possible to improve the characteristics of rest and adapt to each person's body.

At its base layer, this mattress carries a structure with greater firmness; better securing the body weight. The intermediate

layer is ergonomic and responds to the pressure of each body part and the top layer is an adaptation layer corresponding to the body temperature to achieve unparalleled comfort.

This is the mattress you need and will be the one to best adapt to you and not vice versa.

MEMORY FOAM AND SUPERSOFT WITH ACTIVE CARBON

This is the first mattress to use these two elements.

The main benefits of active carbon are its high breathability and the ability to eliminate odors. All this helps to prevent the formation of mold and bacteria produced by normal use and sweat.

By combining such complete material, such as viscoelastic, and another that prevents the formation of mold, such as active carbon, we have created a product that will allow us to extend the life of our mattress and improve the quality of your rest by means of an ergonomic and antibacterial mattress.

In addition, the active carbon captures and eliminates odors, helping to evacuate excess static electricity, providing rest and giving us a more restful and deeper sleep.

3D FABRIC:

The fabric is designed for maximum ventilation and hygiene of all areas of personal contact. It was first intended for use in the hospital environment, but thanks to industrialization, we can enjoy it in our own home.

Its braided fabric has two layers which are connected through millions of polyester fibers, providing the best comfort, maintaining the perfect balance between stability and elasticity, at the same time regulating air and moisture.

CHROMOTHERAPY

LuftHous stands for innovation in each of their products. The color of the PHARMAVISCOS 3D mattress is not a decision taken at random, but rather a choice was made based on color therapy (also known as chromotherapy). This is a type of therapy widely used in alternative medicine, and whose objective is to improve some discomfort through the use of colors.

Red has the following properties: awakens the senses and passions. Associated with power, energy, vitality and the emotions of life. On the positive side it helps to stimulate action, activity, love, vigor and creative power.

COMPOSITION
