**Intended for:** the most demanding people with discomfort or back problems, neck, joint arthrosis, arthritis or problems with

blood circulation and body inactivity and muscle aches. The technical design meets the highest quality and comprehensive quality control in manufacturing.

We used a combination of materials with different properties to improve the characteristics of rest and improve adaptation to each person.

The base of the mattress uses a greater intermediate ergonomic layer that responds to the pressure of each body part and the top layer is an adaptation layer corresponding to the body temperature to achieve unparalleled comfort.

This mattress is presented with special fabric that meets the necessary properties to make your sleep truly luxurious.

Exterior finishes and luxury materials throughout..

Available in all widths and lengths

Thickness: 21 cms.
