

LH TURMALINK PROTECT® VISCOELASTIC GRAPHENE PILLOW

If you're reading this, you're probably looking for a different pillow, one that fits you perfectly; your posture, your physiognomy... well, your search ends here!

Lufthous® brings you the new LH Turmalink Protect® Viscoelastic Graphene pillow.

This is a different pillow, belonging to an exquisite range of products oriented to rest, all manufactured with the latest technology and the best raw materials.

Thanks to its ergonomic design we obtain total support; comfort for head and neck, helping to maintain a better posture and diminishing possible cervical and lumbar discomfort.

Bayscent® ACE

To make your rest experience truly full and rewarding, we have incorporated tourmaline microparticles and a micro-encapsulated treatment of Bayscent® ACE in Strech fabric with Vitamin A, C and E that will accompany you during your sleep.

When we talk about something as essential as rest, we cannot leave loose ends, nor can we skim on resources. That is why we designed a pillow that is completely unique in its composition. Thanks to the graphene foam and its Airflow system, we achieve a memory system (which gives it the greatest possible adaptability), as well as greater breathability and thermal regulation.

As you can see at Lufthous® we take your rest very seriously, and that's why we work so that you sleep better every day.

We wish you sweet dreams with the LH Turmalink Protect® Viscoelastic Graphene pillow.

WHAT IS TOURMALINE?

This is a natural mineral with a complex composition, as it contains fifteen different elements: lithium, nickel, potassium, boron complex silicate, sodium, aluminium, magnesium, etc.

You may be wondering what the benefits of this element are. Well, Tourmaline, as a material with pyroelectric properties (transforms energy as it receives heat), is capable of producing negative ions indefinitely.

When they come into contact with our body, through heat and friction, they generate a thermal effect that increases the temperature and the sensation of well-being.

Its properties applied to the LH TURMALINK PROTECT® Viscoelastic Graphene pillow give it a key factor, helping you to sleep better, and also to do it in a restorative and pleasant way.

GENERAL CHARACTERISTICS OF THE PILLOW

- It adapts to the contours of your head and neck for total support and comfort.
- Helps maintain a good posture that could influence snoring
- Helps reduce cervical and lumbar discomfort
- Helps to promote muscular rest
- For all types of positions: back, side or stomach
- Good transpiration
- Memory with perforated viscoelastic

- Adaptable
- Undeformable, anatomical
- Vaporizes moisture emitted by the body.
- Fabric that prevents the formation of bacteria and mites.
- Double zipper pillowcase that allows perfect breathability.
- Easy to carry, it includes bag with a handle..

A GOOD REST; THE BASIS OF YOUR WELL-BEING

Maybe you've had a bad night's sleep because you don't have the right medium. This can take its toll. That's why at Lufthous® we make sure that every single one of our products is subjected to the strictest quality controls.

We provide all the necessary certifications that verify the origin and quality of our materials.

Your rest and well-being is the greatest reward for our team. Rest like never before with the LH TURMALINK PROTECT® Viscoelastic Graphene pillow.

Thank you for trusting in us.
