

LH BALANCE ION PROTECT MATTRESS

**WITH ANTI-MICROSCOPIC PARTICLE, ANTI-VIRUS
AND ANTI-BACTERIAL TREATED FABRIC**

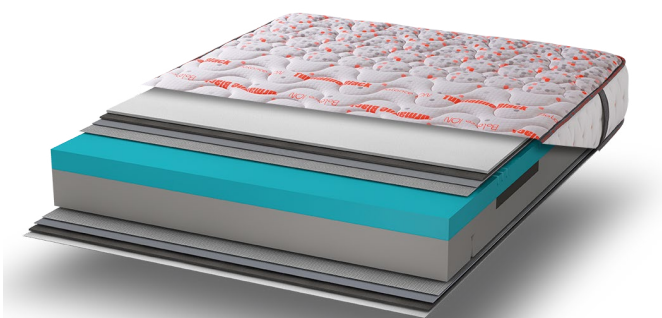

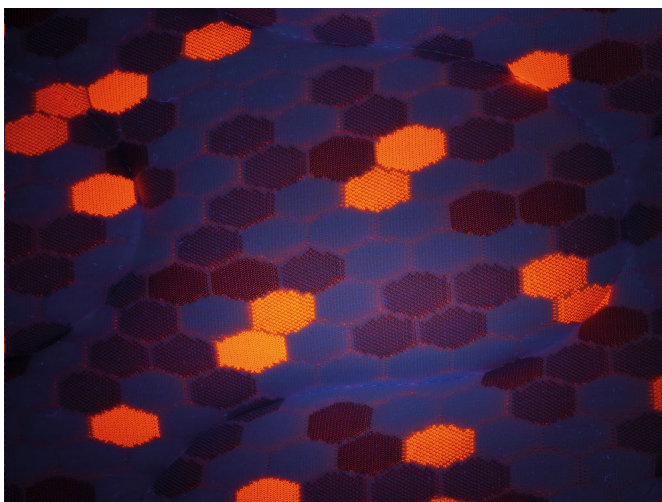

The Lufthous® research and development department has created the LH BALANCE ION PROTECT MATTRESS with a fabric treated with anti-microscopic particles, Antibacterial and Antivirus by the iSys AG and BACTERSHIELD finishes, highlights its high breathability and its ability to eliminate odours, combat electromagnetic radiation with tourmaline, of which it is composed.

**AT LUFTHOUS® WE ALWAYS USE THE BEST
MATERIALS AND THE LATEST TECHNOLOGY.**

Technical fabric with ion nano particles with microscopic anti-bacterial and anti-virus treatment and black tourmaline

The LH BALANCE ION PROTECT MATTRESS has a special fabric with an exclusive Anion treatment, so you can enjoy the benefits of negative ions while you rest, and also the fabric with microscopic antiparticle Antibacteria and Antivirus treatment using iSys AG and BACTERSHIELD, and if that were not enough it has black tourmaline, which is a barrier to electromagnetic radiation.

TEXTILES FINISHED WITH ISYS AG are certified according to the **Oeko-Tex® Standard 100**. The positive properties of silver technology can be transferred to the fabrics used in the mattress by finishing with iSys AG. The application of iSys AG is universal.

The advantages of iSys AG at a glance

- Greater comfort of use due to the pleasant sensation of freshness
- The proliferation of microscopic particles and bacteria is reduced
- “Approved by bluesign®”

BACTERSHIELD FINISHED FABRICS give a fresh and smooth finish, based on silver technology.

Bactershield Properties:

- Fabric with treatment that reduces bacteria
- Comfort and softness
- Freshness and cleanliness
- Ecological certificate

BALANCE ION PROTECT

Balance ION Protect is a protection based on a synergistic mechanism with double action, on the one hand, minerals that emit ultra-low energy and, on the other hand, ceramic that catalyses the generation of negative ions beneficial for your day to day life.

- Prevents the accumulation of undesirable elements
- Reduces fatigue
- Relieves muscle discomfort
- Helps balance

BLACK TOURMALINE

The release of negative ions (anions) through tourmaline provides a natural feeling of well-being. Black tourmaline is able to help us in:

- Protection from electromagnetic radiation.
- Harmonise your body.
- Neutralise the burdens of lack of rest.

With the **LH BALANCE ION PROTECT MATTRESS** we fight those undesirable effects of fatigue and excess cations (produced by electronic devices), thanks to the anions, by compensating the electronic loads.

Another very important benefit is that we provide all the certifications that demonstrate everything we affirm and contribute to the rest to guarantee all that we offer and all the studies developed support it.
