

At **Lufthous®** we are aware of what the fundamental priorities are, and therefore, we seek to establish a link between quality and development, choosing the search for the best scientific and technological advances.

The new range of LH personal care products represents an immeasurable advance in this field. They are made with components carefully selected for your skin and that will support its care and maintenance, such as **Hyaluronic Acid**, which helps achieve significant hydration and has properties that facilitate elasticity. **Aloe Vera** is known for its multiple applications to protect, soothe and nourish the skin. The sum of both elements is the **perfect combination**.

Beauty and personal care are really important, and at **Lufthous®** we take care of every detail.

HERBAL OIL: Its composition provides a sense of comfort and freshness thanks to the use of plant extracts known for their beneficial properties. Its composition helps counteract the signs of "tiredness" in your skin caused by the passage of time.

It is easy to use, just apply a few drops and massage for about 1 minute.

Ideal for the summer months.

REFRESHING GEL: Due to its composition, it is ideal after a hard day's work or physical effort, when your legs are heavy and tired. It soothes and provides the freshness you need.

ALOE GEL WITH TOURMALINE: Tourmaline is a mineral capable of nourishing, revitalizing and brightening... the best way to really take care of your skin and forget about the usual cosmetics.

ELIXIR: Developed using a composition that includes unique elements and plant extracts from biological crops and enriched with hyaluronic acid. Ideal for all skin types after shaving, sun exposure and for skin irritations.

ROSE HIP GEL: Due to its composition, its use provides protection that helps care for and moisturise your face and body skin, contributing to fresh and soft skin. Ideal for people with sensitive or sun damaged skin. Thanks to the gel's renewing properties, it can even help reduce skin imperfections (stretch marks, marks); lighten blemishes... Essential for any time of the year.

RESCUE GEL (ROLL-ON): Made entirely from 100% plant extracts. This product is a great novelty, as it respects your skin physiology and controls its perspiration process, providing a feeling of freshness and comfort throughout the day. Visible results from the first application, without spots or irritation.

ANTI-AGING GEL: The hyaluronic acid in its formula is a natural element found in your skin. However, it begins to disappear with the passage of time, resulting in the appearance of wrinkles. Therefore, the combination of aloe vera and hyaluronic acid is highly beneficial.

BODY LOTION: Its composition provides freshness and comfort, with plant extracts from biological crops and no alcohol. Ideal for skin damaged by sun exposure or with a high level of dryness.

DAY & NIGHT CREAM: Its components have nourishing, moisturising, soothing and protective functions, among others, to help your skin look softer and more hydrated and resist harsh environmental conditions. Intended for all types of people at any time of year, but especially aimed at those with sensitive skin.
