

HUMIFY

HUMIDIFICADOR

LH HUMIFY will help you to maintain the ideal humidity in your home. With its ionising function it will keep away humidity and other elements scattered in the air.

Sometimes the high level of humidity in the home can lead to various consequences and even affect our well-being. We are talking about respiratory discomfort, dryness of the throat and other problems resulting from hot/cold weather.

There are people who use air conditioning and climate control to deal with these problems, which causes sudden changes in temperature and is not recommended and harmful.

The low relative humidity of the environment is a factor that increases the risk of such discomfort and increases the feeling of tiredness, lack of attention.

At Lufthous[®] we work to offer the best solution to the most daily problems, that is why we have designed the new **LH HUMIFY** humidifier, a unique device, with a modern and practical design.

Its main function is to emit water vapour to increase the levels of humidity in the air.

The moisture they release can also relieve common winter heating discomforts such as static electricity.

With its ionising function it will keep away humidity and other elements scattered in the air. In addition, **LH HUMIFY** has room temperature or hot air steam, your choice, and a practical timer for up to 8 hours.

Its operation is totally simple and intuitive and easy to clean. It will become an indispensable element in your daily life.

Touch screen

- 1 - Room temperature steam
- 2 - Humidistat automatically adjusts humidity
- 3 - Timer from 1-2-4 and up to 8 hours
- 4 - Anion generator ionizer
- 5 - Hot steam

There are several benefits of a home humidifier like **LH HUMIFY** such as better rest. And avoid dryness of the environment and therefore of the skin and complexion.

And as if that were not enough, the furniture in your house: wood and leather will benefit from this humidity in the environment.

To a future together. To a better future.
