

AIR ICE&HOT LH AIR CONDITIONER

PLEASANT ATMOSPHERE IN YOUR HOME, HOT OR COLD AIR

Lufthous® a brand that stands out for its versatility and vision in the face of the products it develops, especially when designed for domestic use. AIR ICE&HOT LH is designed to improve the environment of your home. The features presented are totally unique and innovative, and its launch is a major revolution in our product range. You can move it to any room and enjoy all its functions easily and conveniently.

- - Heating
- - Fan
- - Ionizer
- - Anti-Mosquito function
- - Aroma diffuser

With its cold (80 W) / hot dual function (1,000 W – 2,000 W) you always get the right temperature, both in winter and summer.

One of the advantages that you have when using the AIR ICE&HOT LH is that you can program it any way you want, so you can save energy and reduce your electricity bill. As mentioned earlier, this unit is lightweight and portable. You can place it in the area of your home that best suits your needs at any time.

You naturally get the perfect environment because it works only with water or ice. Simply fill the tank and enjoy an ideal temperature in a few seconds.

IONIZING FUNCTION:

The ionizer function is one of the major novelties introduced in the product AIR ICE&HOT LH, which uses and creates negative ions using electricity to remove microscopic particles in the air, turning the surrounding environment into a cleaner and healthier place. Therefore, its use is especially recommended for people with respiratory distress.

Aroma diffusion function:

Thanks to the aroma diffuser creates a pleasant and scented atmosphere in the room where the unit is located. Say goodbye to bad smells.

Mosquito repellent:

The “fogo” pill allows you to relax and forget the terrible bother of these insects (especially in the summer months). You no longer have to install anti-mosquito measures in your home; here is the ultimate solution.

The **flame effect function** can be used with or without the heat function solely as a decorative element. This feature will make your home seem a warmer and more welcoming place, adding a touch of warmth.

Outstanding features

- Hot and cold
