

LH VISION

Cleaning your home is an essential task that sometimes, whether due to a tight schedule or for any other reason, you cannot perform in the most appropriate way.

At Lufthous® we are aware of this complexity and we have developed the LH VISION intelligent robot.

The most surprising and innovative thing about this vacuum cleaner is its integrated camera. You can control the different cleaning parameters from anywhere using the "ROBOT CLEANER" app, which you can install on your mobile.

This modern device is the result of an exhaustive research process, in which we have also incorporated the best possible technological infrastructures.

We can confirm that the result more than fulfils our fundamental objective; with the LH VISION robot you can rest, relax and enjoy your free time while it cleans your home.

It is equipped with everything necessary for impeccable results; great suction power, integrated camera, app-controlled...

We live in new times. It is time to take a step forwards and enjoy the great advantages that the future provides.

Don't forget that at Lufthous® we make it possible for you to enjoy.

INNOVATION AND DESIGN

The latest technological advances offer us the possibility of making unique devices that, until now, could only exist in your imagination.

The LH VISION vacuum cleaner is irrefutable proof that something is changing: our way of developing day by day, the way we deal with our daily habits, how we manage to simplify our obligations and obtain more time for ourselves and those around us.

Thanks to this modern device, not only will you achieve impeccable results in cleaning your home, but you will do so in the most comfortable, quickest and easiest way.

Thanks to its integrated camera, the device develops intelligent mapping of your home (including furniture), which allows it to draw the best route and perform its function in the most effective way.

Moreover, its gyroscopic sensors give the robot the ability to cover the entire surface.

It has two containers: one for water to mop clean your home (mop included), and the other one as a dust container for storing everything that has been vacuumed.

Water tank capacity	300 ml
Dust container capacity	600 ml

Thanks to its charging station your vacuum cleaner will always be available for use. The robot will automatically return to the charging station when the battery is running low. You can also press the Recharge button on the robot or charge the robot immediately using the "ROBOT CLEANER" app.

And you should not forget that you can control it from anywhere using the app installed on your phone.

Save time for you and your family and leave the cleaning of your home in the hands of LH VISION!

TECHNICAL SPECIFICATIONS

Robot dimensions	Diameter	330 mm
	Height	74 mm
	Net weight	2,7 kg
Battery	Voltage	14,4 volts
	Battery	2500 mAh rechargeable lithium battery pack
Cleaning	Dust container capacity	600 ml
	Water tank capacity	350 ml
	Charging time	300 minutes * Charging time under normal conditions is approximately 300 minutes.
	Charging time	100 minutes * With a full load, the LH VISION Vacuum Cleaner will clean for approximately 100 minutes.
System	Power	28 watts
	Operating voltage	14,4 volts
