

## LH ACQUA 718

Can you imagine getting rid of the dirt on any surface in a single pass? Now it is possible thanks to the **LH ACQUA 718**. This state-of-the-art device **allows you to dispose of any type of residue, whether liquid or solid**. And it also has the option of **blowing air out with the force of a blower**.

It is likely, whether because of a busy schedule, that you can barely devote the time you really need to clean your home. At **Lufthous®** we are aware of the difficulty involved, which is why we have carried out an unlimited technical deployment in the development of this modern vacuum cleaner.

Access to the most difficult corners thanks to its enormous power and the many accessories available. **LH ACQUA 718** is unrivalled.

For a simpler life. You need it and we create it for you to enjoy at home.

### **DUO ABSORPTION POWER SOLIDS AND LIQUIDS. AMAZING RESULTS.**

The latest technological advances offer us the possibility of making unique devices that, until then, could only exist in our imagination.

The **LH ACQUA 718** vacuum cleaner is the irrefutable proof that something is changing; our way of developing day by day, the way we face

our daily habits, the means by which we manage to simplify our obligations and obtain more time for ourselves and those around us.

Thanks to this modern device, not only will you achieve impeccable results in cleaning your home, but you will do so in the most comfortable, quickest and easiest way.

Time is the most valuable thing we are given, invest it to the maximum in what really matters; to be happy.
