

THERMIDOR PERPETUAL TIME WATCH

An innovative accessory perfect for keeping track of time and carrying out all the various daily activities, adapting to your day-to-day life and always on time. The watches have an elegant design adapted to the dynamism and personality of both men and women.

TWO UNIQUE MODELS FOR GOOD TASTE LOVERS

These watches are made entirely of hypoallergenic steel which, in addition to allowing anyone to wear them, keeps a perfect shine, preventing darkening and deformation, as it is made of an extremely hard material. At the same time, they are 5-micron-gold plated, providing quality and greater durability. They have a bicolour strap-armis with double safety clasp, very comfortable and made of the latest generation of light alloy.

The central colour of the strap blends perfectly with the round case to create a harmony of distinguished perfection and sophistication. The design of this piece of jewellery has become a distinctive feature of high-end watches.

Its operating system is based on quartz in the form of a sheet for correct and accurate time measurement.

The size of the numerals is excellent for easy reading of the time, and there is a magnifying lens for enlarging the date with a double anti-reflective coating to ensure excellent legibility. In addition, the watch is water-resistant up to 50 metres to allow complete freedom in all your tasks and activities, without having to do without these accessories.

LIMITED AND NUMBERED EDITION PIECES AVAILABLE FOR MEN AND WOMEN

These accessories bring exclusivity and elegance to your wrist. The two models, for men and the cadet model for women, come with a 2-year Thermidor guarantee.
