HYDRONIC PURE

Nature gives us everything we need; air, the food we eat, and of course, water, the element that gives life.

Just imagining a natural place with crystalline waters and we can already feel a true well-being in our interior. This element flows in our environment, and also in ourselves, endowing us with the vital energy that we need to survive.

Given the importance that water has for us, I am pleased to tell you about the new device of the LuftHous brand; HYDRONIC PURE.

This instrument is specially designed to facilitate an unlimited supply of hydrogen-rich water for our consumption. You may wonder what advantages this can have; because it is very simple. HYDRONIC PURE uses the same procedure with which nature purifies water, through movement, natural curves and energy vortices, to add oxygen, minerals and energy. All this translates into incredible improvements in the properties of treated water. You will see how it helps improve your wellbeing through daily use.

Once again LuftHous puts an instrument of amazing and innovative characteristics at your fingertips. Its use is basic and simple.

HYDRONIC PURE is not a water purifier. This innovative device offers a new concept in this field. Now you can enjoy water richer in hydrogen and equipped with a hexagonal molecular structure (such as that found in nature). It also reduces alkalinity, ORP and increases oxygen and minerals.

WATER, LIQUID ELEMENT

The world health organization recommends drinking between 1 and 3 litres of water a day. With HYDRONIC PURE we are exponentially multiplying the benefits of daily water consumption.

Hydrogen is a very beneficial element for our body, since the hydrogen molecule is a potent antioxidant that eliminates free radicals, which are the cause of discomforts, thus eliminating them.

The secret of this force, which hydrogen contains, is its molecular size, since being the first element of the periodic table of the elements, it has the smallest size of all the known elements, that is why it manages to easily penetrate our bodies.

FREE RADICALS

Being in contact with oxygen has a great oxidizing capacity in our body. Both when we breathe and when we come into contact with air. This effect is caused by the so-called free radicals. With HYDRONIC PURE we manage to transform these free radicals, thanks to the fact that we change their oxidizing electric charge into optimal oxygen, which prevents oxidation.

Drinking hydrogenated water with HYDRONIC PURE is completely recommended for all kinds of people, regardless of their age, even for pets, for cooking or preparing infusions (but remember that the water cannot be boiled, since hydrogen is lost at 100° C).

The use of hydrogenated water also has the most varied applications, such as directly on the skin to apply on the skin or on the scalp that can contain free radicals that oxidise.

We can relax with the high levels of hydrogen, since an overdose is impossible because the excess hydrogen always evaporates without leaving a trace.

Of course, the hydrogen produced by HYDRONIC PURE is an antioxidant.

PURE HYDRONIC QUALITY

One of the biggest advantages of HYDRONIC PURE is that it contributes to a decrease in oxidation levels. When oxidation levels are too high, our body has difficulties converting food into energy and ends up becoming fat.

That is why hydrogen is so important, because this antioxidant load of hydrogenated water regulates the oxidation level of our body and facilitates the transformation of these foods into energy.

Although the flavour of hydrogen is negligible in water, you will notice a slight difference when drinking it, due to eliminating the charge of free radicals.

To obtain hydrogenated water of maximum concentration, you must completely fill the bottles, so that it gives time for the HYDRONIC PURE equipment to reach its maximum hydrogenation power. It is also convenient to cover it and keep it in the refrigerator, so that it retains hydrogen for up to 8 hours. If you want to further maximise its potency, keep it in glass bottles and do not shake it too much once closed, so that it does not recover the oxygen contained inside the bottle.

Remember that once the water has lost its hydrogenated capacity, you can re-hydrogenate it as many times as necessary.

WHAT IS THE OXIDATION REDUCTION POTENTIAL (ORP)?

ORP measures the tendency of water and its compounds in solution, to produce oxidation (positive potential) and/or to produce a reduction (negative potential).

WHAT IS THE PH OF WATER?

PH is an indicator of the acidity of a substance. It is determined by the number of free hydrogen ions (H+) in a substance. The pH of hydrogenated water is between 0 and 14. When the PH of a substance is greater than 7, it is a basic substance. When the PH of a substance is lower than 7, it is an acidic substance. The farther the PH goes above or below 7, the more basic or acidic the solution will be.

Why hydrogenated water is beneficial for health

The antioxidant power of Hydrogen is so powerful that it helps eliminate free radicals, which are guilty of premature ageing at all levels.

In addition, Hydrogen is able to penetrate where other antioxidants cannot reach to produce energy through oxygen.

The energy of hydrogenated water

Hydrogenated water gives a greater contribution of antioxidants helping our body to convert food into energy because if we have a high oxidation level, our body would not generate energy alone so as to avoid further oxidation.

TECHNICAL DATA:

- Model: HYDRONIC PURE
- Consumption: 80W.
- Hydrogen concentration: up to 1,000 ppb.
- ORP: between -450 ~ 700 mv.
- Working temperature: 5 pc ~ 40 pc.
- Working pressure: 0 ~ 0.6 Mpa.
- Valid water type: reverse osmosis water.
- Weight: 4.5 kg.
- Measurements: 340 x 119 x 363 mm.
- Input and output voltage: 100 ~ 240V / 50 ~ 60Hz.
- Input water pressure: 5 kg max. Anti-Leakage

With Lufthous Hydronic Pure you will have the largest source of antioxidant in your home.

- Acts against free radicals
- Help your body balance oxidation levels and PH
- Improve your performance

Hydronic Pure by Lufthous, the water that helps your well-being.

Lufthous has designed Hydronic Pure to occupy the minimum space in your kitchen. It offers several installation options to choose the one that best suits your needs.

1st Installation on the countertop of the kitchen connected to the water network of quality or reverse osmosis.

2nd Installation under sink and obtain the hydrogenated water directly in the house tap.
