Cleaning your home is an everyday process of utmost importance. We usually use products that contain chemical agents and are harmful to you and your surroundings.

At Lufthous® we stand out for the innovative use of original elements. We present you our latest proposal; OKO OZEAN.

Following a procedure similar to that carried out by nature (principle of magnetisation; first applied to tap water and then mixed with active oxygen) the water you use daily for cleaning your home will be endowed with purifying properties that are beneficial for a fuller cleaning.

**Innovation in your home by Lufthous®.**

## THE NEW CLEANING SOLUTION

Active oxygen is a natural disinfectant, it does not generate waste and by applying it to the water you use, you help to potentially reduce the harmful substances you could be exposed to on a daily basis.

Its effectiveness in cleaning makes it an indispensable tool in your home.

## DEVELOPMENT IN HARMONY WITH THE ENVIRONMENT

Water is an indispensable element, not only for human beings, but also for the rest of the beings around us. The OKO OZEAN device has been developed following a meticulous protocol, with the aim of producing an innovative and environmentally friendly product.

## LUFTHOUS® QUALITY

After years of work and effort, we have proven to be a benchmark of innovation, commitment and quality.

Each of our devices is the result of numerous investigations and conscientious field work. Only then, we can guarantee that you enjoy fabulous benefits and advantages in your own home that we could only dream of before.

All this wouldn't be possible without your trust. Thanks to you, our project grows and moves in the right direction.

**What is our main objective?** Your satisfaction. For this reason we thank you once again for the support and trust you

**To a future together. To a better future.**

GENERAL CLEANING FOR THE HOME.

COMMIT TO THE ENVIRONMENT.
